Hardware Recommendations

(11/30/2014)

Complete Clinic Software currently runs in all Microsoft supported versions of Windows.

•**Operating Systems** - Windows Vista Business, Windows 7 Professional, Windows 8.1

•**Networks** - Ethernet 100/1000. Windows Server 2008 or 2012. Synology NAS Drives

•**Internet** - DSL or Cable connection to the internet is recommended for retrieving updates and processing credit cards.

•**Processor** - Pentium 2++ ghz or above is recommended

•**Sound Card** - Currently not required but a good idea

•**RAM Memory** - 4 GB recommended for Windows Vista, Windows 7, Windows 8.1

•**Mouse** - Optical mouse – wired or wireless (a wired mouse will have fewer problems.)

•**Hard Disk** - 500GB disk drive (most computers come with this or more).

***DVD RW** - A DVD is sufficient to backup Complete Clinic files unless extensively saving images.

•**Monitor** - 19" Flat Screen or better

•**Printer** - Any Laser Jet or Ink Jet (Hewlett Packard, Oki-data, Epson, Lexmark are all good). If you are going to use a laser printer for printing post cards, a straight thru paper path is recommended. Laser printers are usually slightly more expensive up front, but cheaper to operate than ink jets. Dot Matrix printers are not supported.

•**Label Printers** – All Dymo LabelWriter Models LW330, LW400 and LW450 are supported. (You can purchase printers and labels at our website.)

•**UPS** (Uninterruptible Power Supply) - Capacity to power 650 watts or more.

•**Backup Devices** - Complete Clinic can be easily backed up to a CD RW or DVD RW. CDs or DVDs will preserve your Complete Clinic data, but will not backup the entire hard drive. If you use the computer for a number of applications other than Complete Clinic, you should consider a USP flash drive or USB external hard drive. If you have any questions or concerns about your backups, please call us and discuss them.
