Hardware Recommendations

(02/24/2020)

Recommended Computer Hardware for best performance in running Complete Clinic Software.

•**Operating Systems** - Windows 10 Professional

•**Networks** - Ethernet Gigabit with Cat 5e or 6 wiring.

•**File Servers -** Windows Server 2016.if you have more than 5 workstations.

•**Internet** - DSL or Cable connection to the internet

•**Processor** - 3 GHZ or above is recommended

•**Sound Card** - Not required

•**RAM Memory** - 4 GB Minimum 8 GB recommended

•**Mouse** - Optical mouse – wired or wireless

•**Hard Disk** - 500GB disk drive (solid state if possible)

***DVD RW** - Not Required

•**Monitor** - 19" - 24"

•**Printer** - Any Laser or Ink Jet If you are going to use a laser printer for printing post cards, a straight thru paper path is recommended. Laser printers are usually slightly more expensive up front, but cheaper to operate than ink jets. Dot Matrix printers are not supported.

•**Label Printers** – Dymo LabelWriter Model LW450.

•**UPS** (Uninterruptible Power Supply) - Capacity to power 650 watts or more.

•**Backup Devices -** Complete Clinic can be easily backed up to a USB flash drive or USB external hard drive. If you run CCS from one of our Cloud Servers, backups are done for you.
